Omega Incorporations

Kathmandu

Dear sir/mam,

I am writing to express my interest in the Frontend developer Internship at Omega Incorporations -a company which I admire for its commitment to delivering custom software and web & mobile app solutions, as well as upholding a robust culture of learning and innovation. The opportunity to work alongside experienced developers on real-world projects would be a great help to improve my technical skills and help me launch my career in frontend engineering in the best way i can imagine.

I have a strong foundation in frontend using React.js and Next.js. Also, I've worked on several projects which includes features like user authentication, role-based access, and RESTful APIs. HTML, CSS, Tailwind CSS, JavaScript, TypeScript. React.js, MongoDB and Git/GitHub are among my technical skills. I continue to enhance my skills through coding challenges and practical projects.

I'm mostly excited about Omega Incorporations because of its work-life balance, wellness programs, and mentorship-driven environment. I find this fellowship as a learning experience that will play a key role to advance in my career as a professional software developer.

In addition to my technical background, I also bring excellent communication and interpersonal skills developed through more than two-year experience as a Sales Representative at Oliz Store.

Thank you for considering my application and I look to hearing from you soon.

Kind regards,

Kapil Raut
